

Equine Gait and Conformation Analysis Intake Form

CONFORMATION:

Proportion _____
Shoulder angulation _____ | Pelvic angulation _____
Length of neck to back _____
Straightness of forelimbs from the front _____
Straightness of forelimbs from the side _____
Straightness of hindlimbs from the front _____
Straightness of hindlimbs from the side _____

GAIT (observe at walk and trot and assess each of the qualities below):

Rhythm: _____
Balance: _____
Impulsion: _____

ON STRAIGHT LINE (observe at the walk and trot from in front, behind and alongside):

Fluidity and ease of movement _____
Free use of head and neck _____
Foot placement _____
Straightness of body _____
Length of stride in front _____
Length of stride behind _____
Joint Flexibility _____

ON CIRCLE (observe at the walk and trot both directions):

Describe mvmt to the left _____
Describe mvmt to the right _____
Fluidity and ease of movement _____
Symmetry _____
Tracking correctly on the circle _____

NOTES:
